The results of the recent prioritisation exercise, which was carried out to assist the Secretariat in its preparation of the TDPC Programme of Work for 2005-2006, highlighted regional policies for competitiveness and growth as a high priority for the TDPC and its Working Parties. The following papers focus on the results of the conference held in Warrenton, Virginia, March 2004, and on the proposed issues from the conference in

Oaxaca (7-8 April 2005). The results of conferences and of past and ongoing case-studies will contribute to the report on place-based policies for Rural Development to be finalised end of 2005.

**Item 6: Strengthening the Links between Urban and Rural Areas - Issues Paper**

The Secretariat will present an issues paper on *Strengthening the Links between Urban and Rural Areas*, which will raise key questions in two types of regions (metropolitan with rural surroundings; typically rural) where the impact of rural-urban linkages differs because of dissimilar size and population densities, although governance issues are common to both. Delegates will be invited to discuss the innovative policies which are required or are presently being implemented in their country in order to:

- a) better manage growth in metropolitan regions from both the rural as well as the urban standpoint, in particular by improving spatial planning and functional linkages;
- b) maintain and enhance the economic sustainability of rural regions, in particular by promoting small and medium sized hub towns, improving communications and public service delivery.
