

Regional GDP per inhabitant in 2008

GDP per inhabitant ranged from 28% of the EU27 average in Severozapaden in Bulgaria to 343% in Inner London

In 2008, GDP per inhabitant¹, expressed in terms of purchasing power standards², in the **EU27's** 271 NUTS-2³ regions ranged from 28% of the EU27 average in the region of **Severozapaden** in Bulgaria, to 343% of the average in **Inner London** in the United Kingdom.

This information is taken from data released by **Eurostat, the statistical office of the European Union**.

Eight capital regions in the ten first places

The leading regions in the ranking of regional GDP per inhabitant in 2008 were **Inner London** in the United Kingdom (343% of the average), the **Grand Duchy of Luxembourg** (279%), **Bruxelles/Brussels** in Belgium (216%), **Groningen** in the Netherlands (198%), **Hamburg** in Germany (188%) and **Praha** in the Czech Republic (172%). Among the 40 regions exceeding the 125% level, ten were in **Germany**, five in the **Netherlands**, four each in **Austria** and the **United Kingdom**, three each in **Spain** and **Italy**, two each in **Belgium** and **Finland**, one each in the **Czech Republic**, **Denmark**, **Ireland**, **France**, **Slovakia** and **Sweden**, as well as the **Grand Duchy of Luxembourg**.

It should be noted, however, that in some regions the GDP per inhabitant figures can be significantly influenced by commuter flows. Net commuter inflows in these regions push up production to a level that could not be achieved by the resident active population on its own. The result is that GDP per inhabitant appears to be overestimated in these regions and underestimated in regions with commuter outflows.

One in four regions below 75%

The lowest regions in the ranking were all in Bulgaria and Romania, with the lowest figures recorded in **Severozapaden** in Bulgaria (28% of the average), followed by **Nord-Est** in Romania (29%), **Severen tsentralen** and **Yuzhen tsentralen** in Bulgaria (both 30%). Among the 64 regions below the 75% level, fifteen were in **Poland**, seven each in the **Czech Republic** and **Romania**, six each in **Bulgaria** and **Hungary**, four each in **Italy** and **Portugal**, three each in **Greece**, **France** (all overseas departments) and **Slovakia**, two in the **United Kingdom**, one in **Spain**, as well as **Estonia**, **Latvia** and **Lithuania**.

1. GDP, and thus GDP per inhabitant, provides a measure of the total economic activity in a region. It may be used to compare the degree of economic development of regions. GDP does not measure the income ultimately available to private households in a region. Details of the methodology used can be found in "Regional Accounts Methods: gross value added and gross fixed capital formation by activity", **Eurostat**, 1995, ISBN 92-827-0159-X.
2. The PPS (purchasing power standard) is an artificial currency that takes into account differences in national price levels. This unit allows meaningful volume comparisons of economic indicators over countries. Aggregates expressed in PPS are derived by dividing aggregates in current prices and national currency by the respective Purchasing Power Parity (PPP).
3. These data are based on the Nomenclature of Territorial Units for Statistics (NUTS) as last modified in February 2007. NUTS 2006 provides a uniform, consistent breakdown of territorial units for the production of regional statistics for the EU. Level 2 of the nomenclature has 271 regions: Belgium (11), Bulgaria (6), the Czech Republic (8), Denmark (5), Germany (39), Ireland (2), Greece (13), Spain (19), France (26), Italy (21), Hungary (7), the Netherlands (12), Austria (9), Poland (16), Portugal (7), Romania (8), Slovenia (2), Slovakia (4), Finland (5), Sweden (8) and the United Kingdom (37). Estonia, Cyprus, Latvia, Lithuania, Luxembourg and Malta are all considered as single regions at NUTS 2 level. For a list of the European statistical regions see: http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/introduction.
